Experience

August 2020-Present

The Orbit Project | UX Research Assistant

Currently in progress

May 2020-August 2020

Movley | UX/UI and Graphic Design Intern

—Worked with product manager and engineers to design the company website and the MVP for the client-facing and back-office portals
—Performed preliminary research and collaborated closely with stakeholders & product manager
—Designed information architecture, wireframes, and prototypes
—Leveraged interaction design principles and practices to design intuitive and user-friendly interfaces
—Performed usability testing with clients on the MVP

May 2019-August 2019

HOOR Detroit | Design Intern

Participated in design research, concept generation, and layout in a variety of publication projects. I also assisted in an array of roles, such as marketing strategy, in addition to the primary role of graphic design.

Notable Projects

Homeschoolers

SI 482: A platform that fosters community and interaction between high-school students as they navigate remote learning.

Molarvate: an mHealth app

ARTDES 345: Molarvate supports individuals in optimal oral health behaviors. The engagement app summarizes OHBs passively collected by sensor-enabled toothbrushes and provides feedback and delivers timely, personalized digital oral health interventions to patients.

Movley's Client-facing Portal for Inspections Bookings

Designed the MVP of a booking flow for the new client-facing portal that made the lengthy manual booking process as easy and stress-free as possible.
